

# Web Community Manager 2.21 Release Notes

## New or Changed Functionality or User Experience

### Support for Blackboard Ally

If you have licensed Blackboard Ally, you can assess the accessibility of your Web Community Manager site content and files. View high-level reporting from a Site Workspace in Site Manager.

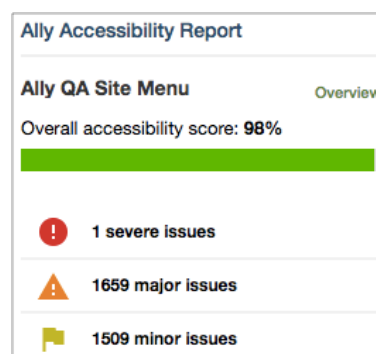

### Ally Accessibility Scores And Issues

Ally provides accessibility scores to measure accessibility of pages and files. Accessibility scores are determined by the severity of issues in each digital file. The higher the accessibility score, the more accessible your content. A low score means low accessibility.

Ally categorizes accessibility issues to reflect how many students are affected and the extent of the issues. Accessibility issues are categorized by Severe, Major, or Minor.

- Severe (red stop sign). These issues are the greatest risk to accessibility, and require the most attention.
- Major (yellow caution). These issues impact accessibility, and while not severe, require attention.
- Minor (green flag). These issues should be considered for a better accessibility score.

Select *Overview* in the *Ally Accessibility Report* for detailed reporting. To learn more, see [Ally Institution Report](#). Please note that *Courses* in the report refer to Sections on your site.

# Web Community Manager 2.21 Release Notes
